

CERTIFICATION

- Product Certification
- Management Systems Certification
- Industrial Training (including HACCP and ISO 9001 Trainings)
- Made-In-Ghana Certification

METROLOGY

- Calibration & Verification of measuring instruments, equipment and devices.

These services cover:

- Mass Measurements
- Dimension & Linear Measurements
- Pressure & Force Measurements
- Volume & Flow Measurements
- Temperature Measurements
- Time & Frequency Measurements

OUR ACCREDITATION

Our Metrology Laboratories (Mass, Temperature, Volume, Balance, Humidity and Pressure Laboratories) and Testing Laboratories (Microbiology, Metallic Contaminants, Histamine/Mycotoxins, Food and Drinks, and Pesticide Residue Laboratories) are internationally accredited to international standards including ISO/IEC 17025, making GSA the trusted home of Certification, Calibration and Verification, Import and Export Inspection, and Testing of products from diverse industries.

Our Systems Certification and Products Certification Departments have also been accredited to ISO/IEC 17021-1 and ISO/IEC 17065 respectively. Our Fish Inspection Department is accredited to ISO/IEC 17020:2012 to carry out pre-shipment of fish and fish products for export.

GSA GOES DIGITAL

GSA COREOPS

The GSA CoreOps is a digital platform where the Authority's operations will be easily accessed by the public for effective and timely delivery of our services.

Steps to follow

- Create an online account
- Request for any GSA services
- Pay for services online using:
 - Momo
 - Debit Card
 - Bank Card
 - Pay at the Bank

With GSA CoreOps

- Customers do not have to physically visit our premises to enquire about the status of their requests.
- Customers can make payments from the comfort of their homes.
- Major reduction in bureaucracy
- Customer enquiries and concerns will be address within a short period

Closing Prayer & Announcements

*Refreshments / Media Engagement

GHANA PROMOTES THE SDGs VIA STANDARDS AND CONFORMITY ASSESSMENT

At the heart of the UN's 2030 Agenda for Sustainable Development are 17 SDGs which serve as a “blueprint to achieve a better and more sustainable future for all.”

“The GSA over the years has played a key role in promoting rapid industrialisation growth through the development of relevant standards and engaging in conformity assessment activities like inspection, testing and certification,” Prof. Alex Dodoo, Director-General of the Ghana Standards Authority stated.

The theme for this year's World Standards Day celebration recognises the tremendous role that standardisation plays in the achievement of the SDGs and the implementation of these goals with a special focus on advancing Industry, Innovation and Infrastructure (SDG #9), ensuring Clean Water and Sanitation (SDG #6) and a call for Climate Action (SDG #13) as well as the partnerships and collaborations necessary for success.

Let's make our shared vision a reality!

ABOUT GSA

Ghana Standards Authority is the Statutory Body responsible for the national quality infrastructure embracing Metrology, Standards & Conformity Assessment.

SERVICES Standards

- Development of Standards
- Sale of National & International Standards
- Promulgation of Standards
- Public Education on Standardisation
