

PRESS RELEASE

MASONRY CEMENT TYPE M

The Ghana Standards Authority wishes to inform the general public, especially the Building and Construction industry, that it has approved the production and sale of a new cement type, MASONRY CEMENT TYPE M, on the Ghanaian market. This cement conforms to the Ghana Standard for Masonry Cement Type M, GS C91/C91 M 2018, which is also aligned to international standards.

This new cement type is an innovation and will contribute to the nation's drive to produce more environmentally sustainable products which have lower carbon footprint.

GHACEM LIMITED is the first company to be certified to produce and sell such a cement on the Ghanaian market, through its product the GHACEM SUPERPLAST MASONRY CEMENT TYPE M.

MASONRY CEMENT TYPE M is for plastering and laying of blocks ONLY and should be used exclusively for such purposes. It should not be used for concrete and structural work.

For further information, contact the Ghana Standards Authority or visit our website at www.gsa.gov.gh.
